PROJECTS

ELECTRONICS COMPONENTS E-COMMERCE WEB APP | TEAM LEAD FRONTEND

React Js, HTML, CSS and JavaScript

The frontend of the Electronics Components E-commerce Web App is built using React.js, a popular JavaScript library for building user interfaces. The application follows a modular and component-based approach, with reusable components created using React.js. The user interface is designed using HTML and CSS, providing a visually appealing and responsive design for optimal user experience across different devices.

NFT TRADING PLATFORM | FULL STACK DEVELOPER

React Js, HTML, CSS and JavaScript

The NFT Trading Platform is a web application designed and built to facilitate the buying, selling, and trading of non-fungible tokens (NFTs). The platform provides a user-friendly interface for NFT collectors, artists, and investors to engage in the booming NFT market.

Frontend Development:

The frontend of the NFT Trading Platform is built using React.js, a popular JavaScript library for building user interfaces. The application follows a modular and component-based approach, with reusable components created using React.js. The user interface is designed using HTML and CSS, providing a visually appealing and responsive design for a seamless user experience across different devices
